Introduction

Ginnie Mae continues to enhance the pool level disclosure data provided to the marketplace. The existing Consolidated Disclosure File Version 2.2 (daily.txt, nissues_YYYYMM.txt, and monthly_YYYYMM.txt) is being transformed to provide separate, more focused and enhanced files on Single Family pools. In Disclosure Bulletin 2018-047 Ginnie Mae announced enhancements to the disclosure data for Multifamily securities. Multifamily disclosure will be removed from the Consolidated Disclosure File V2.2. Multifamily disclosure data will be in separate enhanced files specific to the Multifamily products (see Disclosure Bulletin 2018-077).

The final step in transforming existing Consolidated Disclosure File V2.2 is the enhancement of the MBS Single Family Pool disclosures (Single Family: Ginnie I pools; Ginnie II Custom Pools; Ginnie II Multiple Issuer Pools).

This document provides the technical specification for the file layouts, record types, and data for the Single Family Enhanced Pool Level Disclosure.

Single Family Pool Level Disclosure Summary Characteristics

Characteristic	Description
Two Physical Files	<p><u>SF Pool/Security File</u>: Pool/Security information with one record per active pool. This will be one physical file with single header record at beginning of file and single trailer record at end of file.</p> <p><u>SF Pool Supplemental File</u>: Supplemental information for all pools, with multiple records per pool. This will be in one physical file with single header record at beginning of file and single trailer record at end of file.</p>
SF Pool/Security Record Type	One Record Type with basic information about the Pool and also provides the Security RPB, RPB Factor, and Weighted Averages (WA) for various attributes. This record is an enhanced version of the current “D” record in the Consolidated Disclosure File V2.2. The SF Pool/Security File will only contain a header, trailer, and this one record type for each active pool.
SF Pool Supplemental Record Types	Twenty-eight (28) Supplemental Record Types providing extensive information about the pool activity and characteristics. Most of these 28 Record types have common format and enumeration characteristics.
Flexible Format	All Records are produced as text format with Pipe () delimited separation between fields. The files will be published in compressed (zip) format.
Population of Records and Fields	<p>SF Pool/Security Record will always be produced. There can be occurrences of “ ” bar-bar where there is no data value for a field.</p> <p>SF Supplemental Records are “data driven” and therefore individual Record Types are produced based on the characteristics of the pool.</p>

	Fields within Record Types are “data driven” and therefore populated based on characteristics of the pool. There can have occurrences of “ ” bar-bar, where there is no data value for a field.
“At Issuance” Historical Data	The SF Pool/Security Record has four fields for historical "At Issuance" data. This will be a "point forward" implementation for these four history fields. It is anticipated that the first release will have blanks in these fields. The point forward population of these fields is to be determined and will be announced in a future Disclosure bulletin.
Explicit Decimal Point	For fields that have values with decimal points, the SF Pool/Security File records and the SF Pool Supplemental File records will explicitly include the decimal point;
Sort Order of Records	<u>SF Pool/Security File</u> : Records will be sorted by Pool ID in ascending order. <u>SF Pool Supplemental File</u> : Records will be sorted by Pool ID (ascending order); Record Type within Pool; Field Value(s) within Record Type
Record Type Layouts—Item Number	Each of the Record Type layouts in this document have an “Item” number column. The Item numbers are for documentation reference only, and are not included in the physical output record.
Daily New Issuance, Monthly New Issuance, and Monthly Portfolio	The file layouts are the same for: MBS Daily Pool New Issuance, Monthly Pool New Issuance, and MBS Pool Monthly Portfolio disclosures.
Initial Implementation Dates	New Issuance Files (Daily and Monthly) are targeted for production release beginning with June 2020 New Issuances. Monthly Portfolio will begin with June 2020 data, produced on the 6 th business day of July. <ul style="list-style-type: none"> • First Daily New Issuance (June 1, 2020 with June data) • First Monthly New Issuance (July 1, 2020 with June data) • First Monthly Portfolio (July 9, 2020 with June data)
