Are You a Homeowner Having Difficulty Making Mortgage Payments?

If you are a homeowner experiencing financial hardship directly or indirectly related to Coronavirus (COVID-19), contact your loan servicer (the company listed on your mortgage statement) right away to discuss your options.

The Department of Housing and Urban Development (HUD) published guidance for how the Federal Housing Administration (FHA) should handle mortgages that it insures. Similarly, the department of Veterans Affairs (VA) published information for mortgages it guarantees, and the Department of Agriculture published guidance for mortgages insured by Rural Development.

HUD has also developed an informational video for homeowners that lists important questions every homeowner should ask when discussing forbearance options with their servicer.
